Information as of 06/30/2020

This fund is only available in the Personal Retirement Planner Deferred Variable Annuity.

Description:

The portfolio employs a “passive management”—or indexing—investment approach designed to track the performance of the Standard & Poor’s 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The portfolio attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. This is a moderately aggressive investment.
